

GSA Office of General Counsel

November 2, 2005

Deborah Mellot
Acting Strategic Integration Manager
Emergency and Remedial Response Division
U.S. Environmental Protection Agency, Region II
2890 Woodbridge Avenue
Edison, NJ 08837-3679

NOV -7 2005

Dear Ms. Mellot:

This is in response to your request for information IAW CERCLA Section 104(e) regarding the Bayonne Barrel & Drum Superfund Site (the site) located in Newark, New Jersey. We found no documents responsive within the General Services Administration.

Enclosed is the GSA response to specific questions you asked in your Request for Information. Because we found no responsive documents, the responses are quite short. If we discover further information pertaining to the site, we will notify you. A copy of this letter will also be provided to Sarah Flanagan. If I can be of further assistance, please do not hesitate to contact me at (202) 501-0277 or ruth.kowarski@gsa.gov.

Also attached for your information and use is a Memorandum of Understanding establishing that in 1988 the Defense Logistics Agency and its subordinate agency, the Defense National Stockpile Center, acquired responsibility for all personnel, functions and records of former Defense National Stockpile Center, acquired responsibility for all personnel functions and records of the former defense Stockpile Reserves. Consequently, any records pertaining to the removal or disposal of strategic and critical materials or the activities associated therewith (including any possible refurbishment of storage drums) would reside with the DLA/DNSC, rather than the GSA.

GSA conducted a review of records located within the New York and Philadelphia regions to see if any documents could be found establishing the existence of dealings between the GSA and the Bayonne Barrel and Drum Company regarding the operation of a supply depot located in Belle Meade, New Jersey during the time period of 1950 to 1982. Moreover, as explained in the attached affidavit, GSA never operated a supply depot in Somerville, New Jersey, rather the Somerville depot housed a Defense Stockpile function that was subsequently transferred to DLA.

To date no records have been found responsive to this information request. GSA will update this response, should any further information be located by the GSA, Office of Regional Counsel for the Northeast and Caribbean Region (New York).

Sincerely,

Ruth Kowarski

Ruth Kowarski

Senior Assistant General Counsel

General Services Administration

Office of Real Property

1. General Services Administration, Office of Counsel, Real Property Division (LR), 1800 F Street, NW, Room 4137, Washington, DC 20405.

2. No further information other than the documents provided by EPA.

3. No further information.

4. No further information.

5. No further information.

6. No further information.

7. No further information.

8. No further information.

9. No further information.

10. GSA still owns the Belle Meade General Depot and is in the process of trying to conduct a negotiated sale of this property to a local Government. Per a July 2001 CERCLA Preliminary Assessment conducted by Parson's Engineering on behalf of the Defense Logistics Agency, the following is the history of the Belle Meade Depot:

"2.3.2 History of the Belle Mead Army Depot

2.3.2.1 The Belle Mead Army Depot began operations in 1942. The depot was operated by the United States Army Supply Service Network from 1942 through 1958 and by the GSA from 1958 through 1991. The depot, originally known as the Bound Brook Defense Aid Depot, was used as a "Quartermaster Depot" and as a transfer point for material to support Allied Forces. In addition, the depot was reportedly used to house German and Italian prisoners of war. There were reportedly approximately 5,000 people working at the depot."

By way of further reply, in 1988 the Defense Logistics Agency and its subordinate agency, the Defense National Stockpile Center, acquired responsibility for all personnel, functions and records of former Defense National Stockpile Center, acquired responsibility for all personnel functions and records of the former defense Stockpile Reserves. Consequently, any records pertaining to the removal or disposal of strategic and critical materials or the activities associated therewith (including any possible refurbishment of storage drums) would reside with the DLA/DNSC, rather than the GSA.

11. Please see response to question 10 above. No further information.

12. Please see response to question 10 above. No further information.

13. The following individuals were consulted in preparing this response:

Ms. Carol Ann Latterman, GSA Regional Counsel, General Services Administration, Northeast and Caribbean Region, New York, NY;

Mr. Lionel Batley, GSA Regional Counsel, General Services Administration, Northeast and Caribbean Region, New York, NY;

Mr. Robert J. McCall, Regional Counsel, General Services Administration Mid-Atlantic Region, Philadelphia, PA.;

Mr. Steve Stout, Environmental Engineer, General Services Administration, Mid-Atlantic Region, Philadelphia, PA.;

Mr. Bernard K. Schafer, Senior Assistant General Counsel, Real Property Division, U.S. General Services Administration, Office of the General Counsel, 1800 F. Street, NW Washington, D.C. 20405. - Question 10

14. Attached for your information and use is a Memorandum of Understanding establishing that in 1988 the Defense Logistics Agency and its subordinate agency, the Defense National Stockpile Center, acquired responsibility for all personnel, functions and records of former Defense National Stockpile Center, acquired responsibility for all personnel functions and records of the former defense Stockpile Reserves. Consequently, any records pertaining to the removal or disposal of strategic and critical materials or the activities associated therewith (including any possible refurbishment of storage drums) would reside with the DLA/DNSC, rather than the GSA.

15. The following individuals may have information or documents relating to question 13:

Mark Holycross, Major U.S. Army, Litigation Attorney, Department of the Army, United States Army Legal Services Agency, 901 North Stuart Street, Arlington, Virginia 22203-1837.

Scott Romans Counsel, Defense National Stockpile Center, 8725 John J. Kingman Road, Suite 3229, Fort Belvoir, VA 22060-6223.

bcc:
Subject: Bayonne Barrel and Drum Site - partial response to EPA 104 Request

Sarah,

As we discussed on the telephone last Friday, attached is a declaration from GSA concerning the Higgins Site. It is provided since it will help explain the status of the Belle Meade site and references Belle Meade record searches that were done by GSA on another case captioned as United States v NCH. Similar document searches were also performed by DLA and the Army. Also attached for your information and use is a Memorandum Of Understanding establishing that in 1988 the Defense Logistics Agency and its subordinate agency, the Defense National Stockpile Center, acquired responsibility for all personnel, functions and records of the former Defense Stockpile Reserves. Consequently, any records pertaining to the removal or disposal of strategic and critical materials or the activities associated therewith (including any possible refurbishment of storage drums) would reside with DLA/DNSC, rather than the GSA. As discussed, GSA is conducting a review of records located within the New York and Philadelphia Regions to see if any documents can be found establishing the existence of any dealings between GSA and Bayonne Barrel and Drum with respect to GSA's operation of a supply depot located in Belle Meade, New Jersey during the time period of 1950 to 1982. As you will note from the attached affidavit- GSA never operated a supply depot at the Somerville depot, rather the Somerville depot housed the Defense Stockpile function that was subsequently transferred to DLA.

Thank you for your patience. Please let me know if you have any questions or if I can be of further assistance.

UNITED STATES OF AMERICA,

Plaintiff,

v.

NCH CORPORATION, *et al.*,

Defendants.

C.A. No. 98CV05268

DECLARATION OF
THOMAS Y. HAWKINS

I, Thomas Y. Hawkins, hereby declare:

1. I am employed by the United States General Services Administration ("GSA") as an attorney. I have served as an attorney for GSA for 15 years. I am currently a Senior Assistant General Counsel for the Real Property Division of the Office of General Counsel, working in GSA's Central Office in Washington, D.C. Prior to January of 2002, I worked as an Assistant Regional Counsel in GSA's San Francisco Regional Office, commencing in August of 1987.

2. In my experience with GSA, I have become familiar with the operations of practically all of the various components of the agency, including the Public Buildings Service ("PBS"), which is generally responsible for the real property operations of the civilian executive agencies, and the Federal Supply Service ("FSS"), which contracts for and distributes to both civilian and military executive agencies a large variety of services, supply items and commodities.

3. In my current capacity, I am responsible for overseeing litigation in which GSA is a party by virtue of the real property activities of the PBS. Environmental litigation that may incidentally involve FSS in addition to PBS is within my purview as

90-11-6-0 6003

well. As such, I am responsible for providing information to the Department of Justice ("DOJ") in connection with environmental litigation in which GSA is involved.

4. It is my understanding that GSA responded to certain interrogatories and document requests served on GSA by NCH Corporation in the above-captioned litigation prior to my arrival in Central Office. It is also my understanding that NCH has since alleged that GSA's response was deficient. DOJ attorney Mike Rowe contacted me, and requested that GSA review its prior response to verify that it was based upon a complete and thorough search of relevant records.

5. It is my understanding that the subject action concerns a superfund site known as "Higgins Farm," among other things. The premise for GSA's alleged liability is the fact that a certain waste hauler recorded a small number of transactions with GSA that may or may not reflect the transportation of hazardous wastes to the contaminated site, some time during the period 1950 to 1985. Consequently, NCH sought to discover information regarding any transactions entered into by GSA whereby that transporter removed wastes from any GSA facility in the State of New Jersey, with particular concern focused on the Belle Mead Depot facility.

6. In connection with Mr. Rowe's request, I reviewed the prior responses and spoke with the GSA attorneys who had undertaken the task of gathering the information necessary for providing the responses. In addition I spoke to certain of the GSA officials who were personally involved in the search for records.

7. On the basis of my conversations with other GSA personnel, I requested that certain additional searches be conducted. Following these additional searches, I have concluded that GSA has made a complete and thorough search of relevant records.

8. In order to articulate the basis for my conclusion, it is necessary to provide certain background information concerning the role played by GSA as a federal agency, its internal organization, and the manner in which it relates to other federal agencies. In discussing these, I am drawing upon my knowledge of the statutes and regulations that

establish GSA as an agency and govern its operations, upon my practical knowledge of GSA policies and procedures, and upon the conversations I have had with various GSA personnel before and since Mr. Rowe's request.

9. First, in order to understand the logic of the record search, one must understand GSA's functional and geographical organization. GSA has many functions, but the primary functions of relevance in the current matter are those carried out by PBS and FSS. All of GSA is managed by a Central Office in Washington, DC, but operational responsibility for performance of GSA's functions is generally located in the 11 Regional offices nationwide. Of interest in this particular case are Region 2, based in New York City, and Region 3, based in Philadelphia.

10. Within each regional office are regional PBS and FSS offices. They are organizationally distinct, and maintain custody of separate systems of records relating to their operations.

11. PBS is often referred to as "the Government's landlord." It has administrative jurisdiction over most civilian facilities, e.g., federal buildings, courthouses, government laboratories, and certain warehouse facilities. It is not by any means, however, the exclusive civilian land-holding agency. Notable exceptions include the Postal Service, which controls all postal facilities, the Department of Veterans Affairs, which controls its hospital facilities, and the Department of Energy, which controls its system of national laboratories.

12. With respect to those properties controlled by PBS, PBS undertakes the responsibility for operation and maintenance of the physical plant. In return, the federal tenants pay a form of rent to GSA. The rent covers all general purpose facility operating costs, including routine waste hauling, as well as a return on capital, analogous with commercial rent. With few exceptions, GSA contracts with private firms for the performance of maintenance and operation services. These contracts are let by either the regional PBS office or the PBS Field Office assigned responsibility over a given area.

For example, the Belle Mead facility is under the jurisdiction of the Delaware Valley Office with locations in Camden and Trenton, New Jersey, which in turn reports to PBS's Region 3 office in Philadelphia.

13. It may occur that a federal tenant operates an activity requiring special waste handling needs, or may require a special service on an occasional basis. In such cases the tenant will typically be responsible for procuring those services, and it will be the tenant, not PBS, that maintains records relating to the procurement of those services.

14. Additionally, there may be facilities over which PBS would ordinarily retain maintenance and operation responsibility, but for reasons of efficiency delegates such responsibility to a tenant agency. Generally, this is only done in those instances where there is a sole tenant of sufficient size, and with a sufficiently unique activity such that the tenant is deemed better suited to assume such responsibility. In such cases, the delegated tenant pays a reduced rent and directly funds and contracts for operation and maintenance of the facility. GSA remains nominally accountable for the property; funds appropriated to GSA for capital maintenance of such facilities are transferred by GSA to the delegated tenant. Thus, in a delegated facility, GSA will not maintain records of routine maintenance, such as waste hauling.

15. FSS carries out a supply and service function for both the military and civilian agencies of the executive branch. Its supply function is complementary to the supply function carried out by the Defense Logistics Agency ("DLA"). FSS achieves its mission by arranging contractual vehicles other agencies use to obtain needed supplies and services. Additionally, FSS operates a distribution system that includes several supply depots, from which various agencies may order supplies purchased and warehoused by FSS. The FSS supply depot in Belle Mead was part of FSS's supply distribution system. FSS also operates the GSA interagency motor vehicle fleet, and operates a number of motor pool facilities as part of that function.

16. In prior years, GSA also operated certain components of the Government's strategic material stockpile operations, first through a branch called the Federal Property Resources Service ("FPRS") and most recently through FSS. This function was transferred to DLA in 1988. The stockpile operation carried out at Belle Mead was part of this stockpile activity.

17. Thus, at a facility such as Belle Mead, GSA had a presence in three distinct capacities. PBS was, and still is, the "landlord" of the facility; FPRS, and then FSS, was the operator of the stockpile at Belle Mead. And FSS was the operator of the supply depot. FPRS and FSS were "tenants" of PBS, even though they were all part of GSA. Therefore, PBS would have custody of GSA's records relating to the operation and maintenance of the Belle Mead physical plant. Separately, FSS maintained records

relating to the operation of the stockpile and depot located at Belle Mead.

18. At the time of the transfer of GSA's stockpile operations nationwide, all employees and records located at the stockpile facility were transferred to DLA. The transfer did not involve the physical relocation of any personnel, offices, or records; rather, official responsibility and custody of personnel, personal property, and records was shifted to DLA. Therefore, although it was at one time responsible for operation of the stockpile at Belle Mead, FSS no longer has custody of the records relating to that operation.

19. FSS did however retain custody and control over the Belle Mead supply depot until the closure of the facility in 1991. At that time, remaining stock on hand and all FSS records were transferred to a new FSS supply facility in Burlington, New Jersey, which opened at around that time. Between the years 1991 and 2001, all of the buildings used by FSS except one were razed. The remaining building was not used for administrative purposes, and housed no records.

20. The Somerville Depot has a slightly different history. It is my understanding from Mr. Rowe that certain former employees suggest that FSS operated a

supply depot at Somerville. However, according to those FSS employees reporting back to me, FSS never operated a supply depot at Somerville but was responsible at one time for the stockpile operation located there. As stated above, the stockpile function was transferred to DLA in 1988. Additionally, consistent with PBS's delegation policies, operation and maintenance responsibility of the facility was delegated to DLA. Consequently, GSA has no custody over any records relating to the routine operation and maintenance of Somerville, either as "landlord" or "tenant."

21. To add yet another layer of complexity on the situation, the FSS supply operation at Belle Mead was, until 1986, managed by GSA's Region 2 FSS office in New York. In 1986, responsibility for the operation of the Belle Mead FSS depot was transferred to GSA's Region 3 office in Philadelphia. According to Region 2 FSS personnel, records formerly maintained by Region 2 relating to the Belle Mead facility were physically transferred to FSS Region 3 at the time responsibility was transferred to Region 3. Likewise, control over Belle Mead was transferred from Region 2 PBS to Region 3 PBS at around the same time, and regional records relating to the facility were then transferred to Region 3 PBS. PBS records maintained at the Belle Mead site remained at the facility, and did not move.

22. Finally, I was aware of Central Office involvement in GSA's potential divestment of the Belle Mead and Somerville properties. While Central Office does not typically maintain records pertaining to operation and maintenance of such facilities, let alone records of any waste disposal, it is my understanding that certain records pertaining to Belle Mead and Somerville found in the Office of General Counsel ("OGC") were produced in connection with the initial response.

23. In view of the foregoing, it appeared to me that to ensure that a complete search was undertaken, I had to verify that the following records were reviewed:

a. FSS Region 2 records pertaining to the operation of the Belle Mead facility, and any other FSS facility located in the State of New Jersey.

- b. FSS Region 3 records pertaining to the operation of the Belle Mead facility, and any other FSS facility located in the State of New Jersey.
- c. FSS Region 3 records formerly maintained at Belle Mead but transferred to the Burlington facility.
- d. PBS Region 2 and Region 3 records pertaining to the operation of GSA facilities in the state of New Jersey, including not only Belle Mead, but also all courthouses, federal buildings, and other facilities operated and maintained by PBS in the State of New Jersey.
- e. Central Office records, if any, pertaining to the operation and maintenance of GSA facilities in the State of New Jersey.

24. Region 2 FSS reported to me the following:

a. In New Jersey, Region 2 FSS operated supply and distribution facilities at Edison and Belle Mead. FSS also maintained an export packing facility at the Military Ocean Terminal, Bayonne, New Jersey. All three supply and distribution facilities have closed. Belle Mead was transferred to Region 3 before it closed. FSS fleet operations continue to function at Edison in facilities owned by the Environmental Protection Agency. PBS does not control that facility.

b. Region 2 FSS personnel searched regional FSS files to determine whether there are any records regarding FSS operations in the State of New Jersey from 1950-1985 involving contracts for the transportation, treatment and/or disposal of hazardous waste.

c. The Region 2 FSS offices that would have such records, if any, were the Office Supplies and Administrative Services Acquisition Center and the FSS Fleet and Personal Property Management Division. Additionally the Contract Management Division in Boston was requested to search its records for possible contract administration on hazardous waste disposal actions in the State of New Jersey.

d. The Office Supplies and Administrative Services Acquisition Center identified three small purchases for hazardous waste disposal in the State of New Jersey during the period from 1950-1985. These small purchases were posted in a manual logbook only by purchase order, and date, but not vendor, and the logbook is still maintained by the Region 3 office. The files themselves have been destroyed consistent with GSA's file retention/destruction guidelines.

e. The FSS Fleet and Personal Property Management Division search did not reveal any records concerning GSA hazardous waste disposal in the State of New Jersey during the period from 1950-1985.

f. The Contract Management Division search did not reveal any records concerning GSA hazardous waste disposal in the State of New Jersey during the period from 1950-1985.

g. Based upon the results of the above searches no record was found of Higgins, Clifford Higgins, Higgins Disposal Service or Higgins Disposal Service, Inc.

25. Region 2 PBS reported to me the following:

a. A search was conducted of all procurement files, building files, and operational files as well as all procurement logs and related documents maintained in the PBS New Jersey Service Center and the Newark Field Office, both located at the Peter W. Rodino Federal Building in Newark, New Jersey. The purpose of the search was to attempt to locate any files, contracts, records, or other documents reflecting GSA contracts for the transportation, treatment, and/or disposal of hazardous waste.

b. The Newark Office is responsible for GSA-operated facilities in the northern portion of New Jersey. Prior to 1986, it had similar responsibility for GSA facilities in the entire state. Any and all records relating to facilities in the central and southern portion of the state, including Belle Mead, Trenton and Camden among other locations, were physically relocated to the PBS Region 3 office in Philadelphia when that region took over responsibility for those facilities. The New Jersey Service Center

(formerly Property Management Center) was created in 1995 to GSA oversee property management activities in the northern portion of New Jersey and Staten Island, NY. It is responsible for supplying the engineering and contracting needs for the properties under its jurisdiction.

c. There were no files located in these two offices relating to the period from 1950-1985. There was a log of ACT (Accounting Control Transaction) numbers located that included numbers issued by the Newark Office (then called Newark Field Office) from 1985-1989. All contractual actions of any size have an ACT number assigned to it, and the log generally records the name of the vendor. A review of that log did not result in the discovery of any ACT numbers issued for work performed by Higgins Disposal Service.

d. The PBS Region 2 Safety and Environmental Management Branch personnel performed a search of its archives, specifically searching for any information pertaining to hazardous material or hazardous waste treatment, transport or disposal for facilities in the State of New Jersey. The Branch maintains "building files" for each owned and leased facility that requires Branch review. Branch personnel reviewed these files for all prior years and found no information relating to hazardous material / waste treatment, transport or disposal for the time period 1950 through 1985. Branch personnel also reviewed subject matter files under the categories of "hazardous materials" or "HAZMAT", "hazardous waste" or "HAZWASTE", and "PCBs." Among the information reviewed was PCB inspection information relating to various sites during the period of August 1, 1980 through May 2, 1986. This information related to inventories of PCB containing equipment and the periodic inspection of the condition of this equipment. However, there are no records or indication of PCB treatment, transport or disposal for the time period 1950 through 1985. We found no reference made to "Higgins" or any combination of the name.

e. It should be noted that up until circa 1990 the mission of the Branch was safety, occupational health and fire protection, hence the former title "Fire and Accident Branch." Therefore the records up to 1985 consist almost exclusively of safety, health and fire issues. What little "environmental" material GSA found consisted of generic policy and program information with no specifics to facilities. The Branch does not maintain waste manifest records.

26. Region 3 FSS reported to me the following:

a. In or about 1986 the Region 3 Federal Supply Service assumed responsibility for the operation of a supply depot located in Belle Mead, New Jersey. known as the Belle Mead Depot. The depot closed in 1991 when the supply and distribution operation was moved to the Northeast Distribution Center ("NDC") in Burlington Township, N.J. The NDC is housed in a leased facility in Burlington Township, New Jersey.

b. Region 3 FSS personnel searched regional FSS files to determine whether there are any records regarding FSS operations in the State of New Jersey from 1950-1985 involving contracts for the transportation, treatment, and/or disposal of hazardous waste.

c. The particular organizations searched were the NDC and the FSS Contracts Division, the two divisions that might have documents covered by the request.

d. The Deputy Director of the NDC searched files that contain records dealing with the disposal of hazardous materials at the NDC. These records were hazardous waste manifest files for 1984 and 1985 for shipment from the Belle Mead Depot.

e. The contracts division searched for files relating to contracts for the transportation, treatment, and/or disposal of hazardous waste either at Belle Mead or at the NDC in Burlington. One employee recalled that the office did not get involved with hazardous waste disposal contracts until the early 1990s at the NDC in Burlington. Log

books for contract actions commence with Fiscal Year 1996. The search did not reveal any records concerning GSA hazardous waste disposal in the State of New Jersey during the period from 1950-1985.

f. Based upon the results of the above searches, the only record regarding GSA hazardous waste disposal in the State of New Jersey during the period from 1950-1985 located by FSS Region 3 was the above-mentioned hazardous waste manifests. None of these reflected any transactions with an entity named Higgins.

27. Region 3 PBS reported to me the following:

a. PBS Region 3 has a field office in New Jersey known as the Delaware Valley Office with locations in Camden and Trenton. The Delaware Valley Office is responsible for the operation and maintenance of government-owned or leased buildings under GSA control within the State of New Jersey, excluding Northern New Jersey, which is under the control of Region 2. Also, because it is a special case, for administrative purposes the Somerville Depot is assigned to the East Philadelphia Office.

b. Included in the real property inventory of PBS Region 3 in New Jersey are the Northeast Distribution Center ("NDC") in Burlington, New Jersey and the Somerville Depot. Responsibility for operation and maintenance of the NDC resides with the Delaware Valley Office. Although the Somerville Depot is on the inventory of GSA, DLA is responsible for operation and maintenance of the Somerville Depot. Therefore, GSA has no records relating to the maintenance and operation of the Somerville Depot.

c. PBS Region 3 personnel searched PBS files in the Delaware Valley Office to determine whether there are any records relating to waste disposal services performed by Clifford Higgins, Higgins Disposal Service and/or Higgins Disposal Service, Inc. for the period from 1950-1985 or any records regarding GSA operations in New Jersey from 1950-1985 involving contracts for the transportation and/or disposal of hazardous waste. As a result of the search no such records were identified or located.

d. PBS Region 3 personnel searched PBS contract files located in the PhilAtlantic Realty Services Center to determine if there are any records relating to waste disposal services performed by Clifford Higgins, Higgins Disposal Services and/or Higgins Disposal Services, Inc. for the period from 1950-1985 or records regarding GSA operations in New Jersey from 1950-1985 involving contracts for the transportation and/or disposal of hazardous waste. As a result of the search no such records were identified or located.

e. The search for documents in the Delaware Valley Office and the PhilAtlantic Realty Services Center included the physical examination by PBS employees of paper documents maintained in the filing systems of each of the offices. PBS employees in the PhilAtlantic Realty Services Center also reviewed data entered into the GSA electronic acquisition system employed by GSA to record procurement transactions, known as Comprizon, and the Federal Procurement Data System ("FPDS") to search for any records related to the document request. The earliest contracts that GSA found records for in these systems were awarded in 1988. A listing of archived contract files was also reviewed; the earliest records are of contracts from the late 1980s.

f. The Region 3 PBS Environmental Engineer also searched for documents covering the Belle Mead Depot remediation investigation project. Although the focus of the investigation was the environmental condition of the facility itself, it was deemed prudent to review it insofar as the Corps of Engineers had gathered a large amount of historical information regarding the facility.

g. The Environmental Engineer located the following documents:

Final Investigation and Analysis of Potentially Responsible Parties
Federal Supply Center
Belle Mead

Final Site Investigation Report
Chemical Bank Property
Belle Mead

Final Pre-Design Investigation Report
Federal Supply Center
Belle Mead

Draft Site Investigation Report
Bridgefield Associates Property
Belle Mead

h. The Environmental Engineer also reviewed files that had been maintained in the Administration Building at the Belle Mead Depot and were transferred to the Trenton Office after the depot's closing. The Administration Building was razed in 1998. None of the documents contained in these files contain any reference to Clifford Higgins, Higgins Disposal Service or Higgins Disposal Service, Inc. The Environmental Engineer found three hazardous waste manifests, dated November 19, 1982, November 22, 1982, and August 27, 1985. None of these referenced Higgins.

28. Central Office personnel indicated the following to me:

a. The OGC files identified in connection with GSA's initial production were collected by an OGC attorney to provide advice to the GSA real property disposal arm in connection with GSA's contemplated disposal of the Belle Mead and Somerville properties. These files included records relating to the transfer of the stockpile function to DLA in 1998; documents related to PBS's delegation of maintenance and operation responsibility at Somerville to DLA; and copies of records relating to the U.S. Army Corps of Engineers' study of the environmental condition of Belle Mead. These were typical of the records that would be collected by OGC in connection with the provision of advice to OGC clients located in GSA's Central Office.

b. OGC staff requested the Central Office clients to search for any other pertinent records that might reflect GSA contracts for transportation, treatment, and/or disposal of hazardous waste from these facilities. No such records were found.

29. Based on the foregoing, I believe that GSA has undertaken a thorough search for all information that would be responsive to the discovery requests served upon

GSA in the subject litigation. The dearth of responsive information is not a reflection on the thoroughness of the search. Rather, it is a function of the nature of GSA's operations, and the negligible volume of hazardous waste ordinarily generated by such operations.

Pursuant to 28 U.S.C. section 1746, I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge, information and belief.

Dated this 7th day of August, 2002.

Thomas Y. Hawkins

DETERMINATIONS WITH RESPECT TO TRANSFER OF FUNCTIONS
PURSUANT TO PUBLIC LAW 100-180 AND EXECUTIVE ORDER 12626

This determination is made pursuant to Section 3203 of the National Defense Authorization Act for FY 1988 (P.L. 100-180), and Executive Order 12626 (February 25, 1988), and 31 U.S.C. Section 1531 and Executive Order 11541. Effective on July 3, 1988, there shall be transferred from the General Services Administration (GSA) and the Federal Emergency Management Agency (FEMA) to the Department of Defense, the personnel, funds, inventory of the National Defense Stockpile, personal property, and records of GSA, Office of the National Defense Stockpile, and FEMA, Office of Mobilization Preparedness, as set forth below, that I hereby determine relate primarily to the functions transferred:

A. Appropriations and Funds

The balance of funds for the operation and management of the National Defense Stockpile for which expenses remain outstanding, as provided in Attachment A, are hereby transferred. Appropriations relating to the FEMA functions transferred are provided for in FEMA's FY 1988 appropriations. Funds required for the FY 1988 operation of the National Defense Stockpile are appropriated through the National Defense Stockpile Transaction Fund.

B. Personnel and Positions

The personnel and positions identified in Attachment B, which total 298 FTE from GSA and 2 FTE from FEMA, are hereby transferred.

C. Property

No real property will be transferred by this order since the Federal Property Resources Service does not own any land. The existing agreements on rental payments for the use of land and facilities used to store stockpile materials will not change, except that DLA will provide such payments from its operating budget for the stockpile included in the 1989 level for Operation and Maintenance, Defense Agencies.

All personal property associated with the National Defense Stockpile function is hereby transferred to the Department of Defense. Included in this transfer are all contracts and any liabilities, rights or interests arising therefrom or related thereto that pertain to the transfer of the National Defense Stockpile from GSA and FEMA to the Department of Defense as evidenced by the transferred records provided for by this Order. This includes personal property owned by GSA and FEMA relating to the functions transferred or U.S. Government-owned property held or used by any contractor under any contract referenced by the preceding sentence.

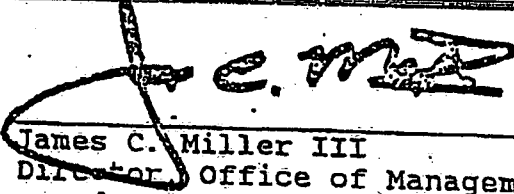

D. Records

The records as identified in attachment D.
